The Roxbury Institute

Beverly Hills, California is now home to the flagship location of The Roxbury Institute, a first-of-its-kind medical facility offering high-end comprehensive care for aesthetics, body contouring, and anti-aging. The moment the elevator doors part, patients are warmly greeted as they enter into a full-service facility that feels more like a five-star hotel than a medical center. The walls are adorned with the works of local artists, while large windows fill the space with natural light and views of the city. The feeling is a welcoming balance of academic prestige, clinical excellence, and high-end aesthetics.

Founded by Dr. David Amron, a celebrity dermatologic surgeon, liposuction expert, and lipedema treatment pioneer, The Roxbury Institute features a fully accredited surgical center focused on delivering targeted comprehensive care and an internationally renowned center for teaching and education. The institute is home to specialists and sub-specialists in nearly every minute aspect of aesthetics and anti-aging, including Dr. Jason Emer, an expert in high definition body contouring, Dr. Jennifer Ahdout, whom specializes in advanced skin care and hair restoration, and several more affiliate surgeons and health professionals. Its diverse services include surgical and nonsurgical body contouring, plastic surgery, dermatology and laser treatments, as well as one of the most trusted anti-aging centers in the country.

SUPER SPECIALIZATION MEETS COMPREHENSIVE CARE

After more than two decades in practice, Dr. Amron founded The Roxbury Institute out of need for a more targeted comprehensive care facility in Beverly Hills. Built on the unique philosophy that aesthetic treatment facilities must set a new standard, while also returning to the traditional value of doctors designing more holistic treatment plans, The Roxbury Institute is dedicated to aesthetic care with internal consideration. Shifting the industry's focus from quick fixes to long-term value and care, it is attracting the attention of individuals in nearly every continent.

Part specialized medical institute, part research facility, The Roxbury Institute has set some of the highest standards for patient excellence in the country. In addition to its employment of leading experts in each aesthetic field, it has also recruited several "super specialists" who have dedicated their careers to highly particular sub-divisions within those fields.

BODY CONTOURING AND AESTHETICS WITH INTERNAL CONSIDERATION

As a leader in the area of liposuction and body contouring, The Roxbury Institute utilizes both surgical and non-surgical techniques to refine results. In their blending of artistry and science, its specialists are sought out by patients all over the world in search of optimized health and beauty. In addition to advanced non-invasive technologies,

such as SculpSure to target fat and cellulite, the institute also specializes in high definition body contouring, fat transfer, and lipedema treatment.

The Roxbury Institute's mission is to provide the pinnacle of aesthetic treatment with special regard for internal care. Patients can work with its established team of super specialists to develop a customized treatment plan that includes:

- Facial and body plastic surgery and/or revisions
- Surgical and non-surgical body contouring
- Fat transfer
- Dermatologic fillers and injectables
- Skin rejuvenation
- More than 25 different laser treatments
- Anti-aging medicine

THE ANTI-AGING CENTER AND SKINCARE LINE

With special regard to the area of anti-aging medicine, The Roxbury Institute has cultivated one of the most specialized, trusted, and respected centers in the country. Offering an extensive range of tests, services, and treatment options, the institute's anti-aging specialists create a baseline for patients, empowering them to build a scientifically-backed treatment plan geared at long-term results.

Within the Anti-Aging Center, patients have rare access to several advanced tests, such as food testing to uncover hidden allergies and sensitivities, pharmacogenomics testing to reveal the affect certain genes' have on patients' responses to certain medications, telomere testing to measure a patient's cellular age against their chronological age, and epigenetics screenings to uncover the different neuro-pathways in the brain and how they manifest themselves in patients' bodies.

The center is staffed with sub-specialists in each particular area of anti-aging medicine, whose focuses include:

- Stem cell therapies
- IV infusions
- Nutritional and gut health counseling
- Hyperbaric oxygen treatments
- Bio-identical hormone therapy
- Nutraceuticals

Additionally, the specialists within The Roxbury Institute have contributed to a customized skincare and Nutraceuticals line with issue-focused serums addressing acneic or problematic skin, sensitive skin, and aging skin.
